

UHV-II

Understanding Harmony

Dr. Sanjay Kumar

Chairperson, Value Education Cell
BIT Mesra, Ranchi.

UHV-I : SIP

UHV-II : 3-credit course

Introductory overview

Education Today :

Does little to help to identify & resolve the conflicts in life

Essential

- To know what is needed to ensure success, balance & happiness in life
- To discover our full potential
- To know our role in human society, in nature
- Being a responsible human being

Our living at 4 levels : Myself, Family, Society, Nature/Existence

We want harmony at all levels

Harmony in myself : Results in

Happiness & Feeling of Prosperity

Harmony in Family : Results in

Mutual Fulfillment in Relationship & Prosperity in Family

Harmony in Society: Results in

Trustful, Undivided & Universal Society

Harmony in Nature/Existence : Results in

Understanding the inherent co-existence

We don't have to create, only have to understand it, to be in it.

Human Values

What is the value of a pen, eye, chair?

What is the value of a human being?

Participation in Nature/Existence

Value Characteristics

Universal, rational, natural and verifiable, all encompassing (all dimensions of living: thought, behavior, work, understanding/realization) (all levels: individual, family, social and nature)

What is innateness of human being?

What is humanness? e.g. neem mango: definiteness.

Value Education

- ✓ Enables to be harmony at all 4 levels
- ✓ Ensures right understanding of the harmony
(Leading to definite conduct)
- ✓ Ensure human values in human being
- ✓ Helps understanding human values

Deals with what is

- Valuable to human being
- Conducive to individual & collective happiness
- Prosperity in a sustainable way

Scope of study

- Understanding of harmony at various levels
- Learning to live in accordance with this understanding
- By being vigilant to own thought, behavior & work

Right understanding : Forms the basis for UHV

In absence

- Driven by our adhoc values and beliefs
- Which may change person to person & time to time
- Leading to conflicts and unhappiness.

Need for value education

Technology & Value Education

Technology only a means to achieve what is considered valuable to human beings in an effective and efficient manner.

It is not within the scope of technology to decide what is valuable

There is a need to supplement technical education with value education

Technology : How to do. Not What & What (this comes from RU)

Different aspects

- ✓ Correct identification of our aspirations
- ✓ Understanding human values to fulfill our aspirations in continuity
- ✓ It gives us a definite way to fulfill our aspirations
 - Value domain: right goal, right direction
 - Skill domain: methods & practices to achieve
- ✓ Values become the source of our happiness, success, fulfilment
- ✓ Benchmark to decide an action is right or wrong, desirable/undesirable

Process of value education

1. Proposals in the form of dialogue
 - First between Tx & Rx
 - Then translated into with Rx herself/himself
2. Verifying the proposal yourselves through experiential validation
 - By being ready to investigate into proposals sincerely
 - By living according to them
3. Proposals need to be naturally acceptable

It may initiate a transformation in our understanding, consciousness & living

Process adopted here is self exploration..

Self Exploration

To find out what is valuable to me by investigating within myself

Process of self exploration

Verify the proposal on the basis of your own NA

Live according to the proposal to validate experientially

1, behavior with other human being, leading to mutual fulfillment

2, work with rest of the nature, this leads to mutual prosperity

Look within: identify own activities, choices, thoughts & desires.

How do we feel about the local issue and global problems?

Self exploration results in realization and understanding

Self exploration

A process of :

- Dialogue between what you are & what you want to be
- Self evolution through self investigation
(Start observing inside, not only outside)
- Knowing oneself & through that knowing the entire existence
- Recognizing one's relationship with every unit in existence.
(Study yourselves & the larger order around)
- Knowing human conduct, human character & living accordingly
- Identifying our innateness and moving towards self organization and self expression.

Content

Desire (what we do? why we do?) & Program (how we do?)

Enables to identify the definiteness of human conduct & to live accordingly

Natural Acceptance

A faculty that is present in each one of us

It is intact and invariant.

We only have to start paying attention to it, to start seeing it.

It is constantly there

Something we can refer to

It is same for all of us

It is a part and parcel of every human being

It is part of humanness.

It does not Change with time

It does not Depend on the place, our beliefs & past conditionings

The basic human aspirations (continuous happiness and prosperity)

Happiness: to be in state of harmony

Prosperity a feeling (is related to material things or physical facilities)

Wealth and prosperity are different

Basic desire is to feel prosperous: wealth is a means to that end.

Prevailing notion of happiness & prosperity has negative consequences

Happiness is small thing, we have higher aspirations such as like contentment, peace and bliss etc.

Fulfilling basic human aspirations

Types of people

Materially deficient , unhappy and deprived

Materially affluent, but unhappy and deprived.

Desirable: materially affluent, happy and prosperous.

Needed right understanding (RU)

RU + relationship= mutual happiness

RU+ physical facilities = mutual prosperity

Need of RU is tied with the need of our happiness

Harmony in the family

Understanding values in human relationship

Social relationship: family, friends, teachers etc...

Relationship is and it exists between the self (I) and other self (I)

Self (I) has feeling in relationship (between I and I)

Feelings can be identified with definiteness.

Cannot be replaced by any material things.

Recognizing & fulfilling leads to mutual happiness in relationship.

Feeling : are values in relationships

Values in human relationships: trust, respect, affection, care
guidance, reverence, glory, gratitude, love.

TRUST

Own judgment : on the basis of your intension

Others Judgment : on the basis of his competence

We trust our intension, but not ready to trust others intension

We see others competence and make a conclusion on their intension.

It is same for others as well

My NA is the same as the NA of the others.

Hence mistrust is born!

How do we know what the other persons intention is ?

Intension is always correct competence I lacking which can be improved by right understanding.

Trust comes from having RU

Right Understanding

Not only I am fine, also working to help others to be like me.
Helps developing our competence

Why people have poor competence?

Lack of attention to understanding the relationship (largely unaware)
Keep doing things, not mean to.

We don't want to get angry (intention)
But end up getting angry (competence)

Competence is to be evaluated when making program with others.

RESPECT

Respect: Right evaluation

Disrespect: Wrong Evaluation

Mistakes : over evaluation, under evaluation otherwise evaluation.

Respect is possible when I see the other is similar to me.

All are similar in terms of

Basic purpose

Program of action

Capability/potential

Our level of understanding may of course be different.

Assumed basis for respect

- Body (sex/gender, race, age, physical strength)
- Physical facilities (wealth, possession, post)
- Belief (isms , sects)

...No notion of respect in term of right evolution.

Harmony in society

Harmony in family is the building block for harmony in society.
From family order to world family order.

Our NA is

- we feel related to everyone.
- to be in harmony with everyone,
- to coexist with everyone.

This is our intention, but our competence might be limited.
We expect same from others.

As our understanding and awareness deepens

- Our competence increases
- We begin to take responsibility
- beyond ourselves & our family to include the entire human society

Comprehensive human goal

(In order of fulfill the basic aspirations of all human being)

1. RU at the individual level
2. Prosperity at family level
3. Fearlessness trust at society level
4. Coexistence at nature level.

All are in sequence

This is the minimum level that each one of us wants, and the maximum we can think of.

This is the goal of human society or the basic need of human civilization.

Facilitating and empowering human towards these goals is real human welfare.

First step is right understanding in the individuals

RU enables to visualize universal human goal in a comprehensive way of human welfare.

Facilitate the process of self exploration which will lead to continuous self evolution of human beings

RU enable humans to live in accordance with NA.

Today : stark contrast: primarily perceived in terms of proliferation of physical facilities (human welfare is primarily perceived in economic terms only)

RU provides us the basis /vision to evolve :

1. Humanistic education system
2. Holistic health care system
3. Appropriate technologies, production system and management models, and an economic order based on recyclability and compatibility with nature.

Program : to achieve harmony at various levels

Dimensions of human endeavors

1. Education-right living, (leads to RU)
2. Health – self regulation (leads to prosperity)
3. Justice- preservation (leads to fearlessness and coexistence)
4. Production- work (leads to prosperity and coexistence)
5. Exchange- storage (leads to prosperity and fearlessness)

Our state today : We have worked hard in all five dimensions of human endeavor, but the lack of RU has created variety of problems

Education : understanding harmony - right living ability to live

Solution : RU and right feeling

Goal of education

Health : body is fit to work according to the needs of the self

Self regulation is the basis of health

Justice

Human-human relation: leading to mutual happiness

Human- rest of the nature relation: leading to mutual prosperity

Required RU of the nature.

Production : work human does on rest of the nature

(what to produce, how to produce?)

Exchange : for mutual fulfillment not madness of profit

Storage for right utilization in future, not hoarding

Money: not a need but only a means to exchange

Harmony in nature

Understanding the interconnectedness and mutual fulfillment

Four orders in nature (kinds of entities)

1. Material order (soil, air, water, metal non metal etc)
2. Plants/bio order (grass trees..)
3. Animal order (animal birds...)
4. Human (knowledge) order : human being (smallest order in size)

First three fulfill each other and coexist with each other.

Human being are neither enriching (fulfilling) for humans nor for other three kinds of entities.

Harmony in co-existence

Understanding existence as co existence

Units are mutually fulfilling to each other , this is being in coexistence

Humans : self organized at the level of body but not at the level of self

At the level of body : Recognizing and Fulfilling

At the level of I : Assuming & Knowing

(in addition to Recognizing & Fulfilling)

Knowing : RU of the harmony at all 4 levels.

Knowing

Knowledge of the self

Understanding the reality of I as being different from body

Knowledge of existence

Understanding of the harmony at all 4 levels

Knowledge of human conduct

Understanding our relationship with every unit in existence & fulfilling it Leading to mutual happiness and prosperity.

All these together is called RU

Same as understanding the harmony at 4 levels of existence.

RU : raising from animal consciousness
to
Human consciousness (Holistic world view)

Animal: Animal reaction :: Human : Response

Animal Needs: physical facilities

Human Needs : Physical facilities + relationship+
RU/knowledge.

Basis for UHV & Ethical Human Conduct

RU provides the basis for

1. Ethical conduct
2. Development of
 - Appropriate technology
 - Production system
 - Management models

To facilitate the holistic way of life

RU through Self exploration

is the only effective way of establishing peace within as well as peace outside.

enables to identify the definiteness of human conduct.

May be called ethical human conduct.

It is same for all human being.

Ethical conduct : naturally acceptable, in consonance with RU leads to mutual fulfillment with other people and mutual enrichment with rest of the nature.

Good professional: ethical conduct + professional skills

Hence : self satisfying, people friendly, eco friendly, universal.

Implications of valued based living:

At the level of individual

Get rid of tension, frustration, depression fills self confidence, joyfulness

At the level of family

Peace and harmony, trust and fulfilling behavior

At the level of society

Fearlessness and mutual trust, reduces differentiations & conflicts

At the level of nature

Reduces pollution, resource depletion.
